## *Introduction*

### *Now Is the Time to Fulfill All Your Desires*

There are no barriers between you and all that you want and need. The condition of luck (emotional, mental, physical, material, spiritual) is a conditioned response to our society. How you think creates today and your future. Your attitude on life is a magnet. Have you noticed that people who always say they are getting a headache... always do. Other people say "I'm always lucky", and they are. Wealth, health, and love just come to them. They expect it! What you put out in thought comes to pass.

In all religions, in all beliefs, all occultists, magi, and shaman work from the same principle, that there is Power in the Word. What you seek most comes to you. Therefore, your intent or purpose when you work Magick is of the utmost importance. When you work with an oil or perfume, focus all your energy (intent) on what you want it to do for you. Everything is made up of energy. People, objects, planets, stars, the universe are all energy in motion. They are all connected to one another through the same force of nature.

Many people do not realize the power they have. You have power and you are a unique person. Remember the power is within you. We live in a holographic cosmos, where all things are part of each other. Interconnected. Microcosm and macrocosm are inseparable. This is where the saying comes from "As above, So below." All of nature is one with us. We can influence ourselves and situations around us through the knowledge and tools given in this book.

When you focus your intent and mentally send it to the universe using a particular oil as a magnifier - with its own energy - you connect the two and create motion to put it to work. All oils have their own vibration which helps attract different situations. Whether you believe in them or not, they will work for you. However, if you add your force to it you will add power, control and direction. You can open hidden doors and remove all blocks.

I suggest that you take notes on what happens during your endeavors. Keep a record so that you can see how a particular method works and what you may want to change or keep the same. You may wish to keep these records in a notebook. In occult we call this a "Book of Shadows". It is meant ONLY for you. To keep track of all your metaphysical-magickal "work". It is a secret book of "work".

In occult there is the Law of Sympathetic Magick. Like forces attract like forces. If you want to manifest money, give money. If you are working on love, give it freely. This ancient art of utilizing oils to achieve goals has been passed down through generations. Use the ability wisely and always do positive work. Know that what you can conceive, you can create. You deserve it!

The use of oils has been with us for centuries. All cultures have utilized this well-known method.

The ancient custom of anointing sacred stones was very widespread as one of the uses of oils. Jacob poured oil on the stone he set to commemorate his vision at Bethel. In India are oiled stones were used for prophecy, at Delphi there was a stone which was anointed daily. In the Bible there are numerous mentions of oils. Even now, there are oils called "miracle oils" being used. They are also used for healing and charismatic revivals in America today.

Various forms and rituals are used to connect shaman, magi, occultists, religious leaders, as well as common people with an understanding and love of nature. Oils bring emotional and material things into your life, as well as spiritual visions, contact with spirits and healing. They also protect and purify and cancel. We work with the vibration of the oils. Although in some cases the scent level is important, usually the subconscious mind will react. The "spirit" of the oil balances us, protects, attracts, and repels things in our lives. By understanding the Laws of Nature, you can work with them to your advantage. Henry Cornelius Agrippa stated; "Magicians are the most accurate Inquirers into nature and frequently produce effects before the time ordained by nature." Man and animal alike react to scents and I am sure you also noticed this in your own life. Look at the way you react to the scent of a rose, then think about the scent of an onion. We still consciously use a sense of smell to tell if fruit is over ripe or there is a gas smell where there should not be one. We automatically sense if there is danger near (gas leak) or salvation (smell of water when you are lost in the woods).

Each person also reacts differently on a subconscious level from past experiences. Use varied oil methods to see which reacts the best for your intent. There are specified methods to use the magickal oils to get the best possible results. These methods have been utilized down through the ages. Magick being the oldest science, tells us that these are tried and true methods of cause and effect. There are numerous methods to correctly harness the power of the oils. The main methods

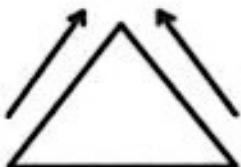

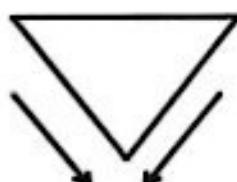

are given here. Read them carefully and follow the directions. Do not forget to always use your focus and intent.

## ANointing THE BODY

When you apply oils to the body, you need to remember to work with two magickal triangles in your mind. The middle (above the navel) to the upper half of the body being a triangle with the point up. The middle (navel) and down to your toes being a triangle with the point down. You must always start at the base towards the point. When you put the oil on your hands, you only need a few drops and to focus on your intent. Continue your focus until you are finished anointing. Use an inward motion - towards you - to attract influences, such as love, money or health. Use an outward motion - away from your body - to repel influences, such as ill health or negativity. Always move in one direction, not alternate back and forth or up and down.

## ANointing OBJECTS

Imagine a triangle surrounding the object. Focus on your intent. If it is to consecrate the object to attract, hold onto something or magnetize, rub the oil with the triangle base away from you and the point towards you. As you draw your intent to you rub the object down or in towards you along the edges. Never rub away from you. That would cancel out your intent and possibly deplete you. If you want to repel something, such as getting rid of bad influences or depression, visualize the triangle with the point away from you. Focus on your intent. This time however, rub the oil from the base nearest to you, away from you towards the point or upward. Always away from you to get rid of the influences.

## HOW TO ANOINT A CANDLE

This secret art of "dressing" a candle is very important in candle burning rituals. Without dressing the candle properly, the effects are very diluted and sometimes neutral. The color, shape or candle in itself may not have enough occult value to be a tool of power. Although these qualities can add to it. There are three ways to dress a candle. All three methods involve you focusing on your intent as you anoint the candles to magnetize them.

### METHOD I

Mentally divide the candle into two parts. From the center to the top of the wick is known as the North Pole. From the center of the candle to the base is the South Pole. Starting in the middle, rub the oil on the candle's surface towards the top of the wick first; then starting in the middle again, rub towards the bottom. Never rub up and down.

### METHOD II

Hold the candle with the wick pointing toward you to attract situations into your life. Start at the base of the candle and anoint the surface toward the wick (towards you).

Hold the candle with the wick pointing away from you to repel or cancel situations. Start at the base (nearest you) and rub the oil towards the wick (away from you).

### METHOD III

There are times when you can not use the two methods above. Such as utilizing a 7 Day candle since it comes in a glass. If you use a pull out candle it is fine. However, when the candle does not pull out, you only have the surface where the wick is to work with. In this case with a drop or two of the oil on your finger tips, rub in a clockwise circle on the top of the candle, from the glass (on the outer side) towards the wick (at the center), all the way to the tip of the wick. To cancel or repel, do the reverse. Start at the wick and rub counterclockwise to the outer edge.

## ANOINTING SEALS

Many occultists use the magickal seals. They increase the symbol or sigil's power by the use of the oils. It is best to anoint these once a week with your focus on your intent, unless otherwise instructed.

On a square Seal, use one or two drops of oil on your finger tip, start at the upper left corner, go clockwise on the edge and each corner until you are back where you started from. Do Not break the contact. If you do so, start at the beginning again. On a circular Seal, start at the left top (more or less) and anoint the seal clockwise on the edge until you are back where you started. Once again, if you break the contact of power, redo it again. Use an oil appropriate for your intent if one is not given.

#### **TALISMAN, AMULETS AND CHARMS**

Anoint these the same way you would a seal. Use an oil appropriate for your intent. Focus while you do so.

#### **MOJO BAGS, MEDICINE BAGS, CONJURE BAGS, SACHETS, CHARM BAGS, OUANGA BAGS, SACRED POWER POUCHES**

Once the bag is finished being made, sewn (or store bought) with all the ingredients in the formulas enclosed, you can anoint it. Put one or two drops of an appropriate oil which corresponds to your purpose in the palms of both hands. Focus on your intent as you pick the mojo bag up and rub it back and forth between your palms. Do this for at least a minute or two until you are comfortable with your focus being strong.

Anoint the same as the candle. Rub clockwise around the rim.

#### **INCENSE HOLDER**

Add a drop or two to your floor wash. Wash your floors as you focus on your purpose. You can also sprinkle this water in the four corners of your rooms where ever there are fully carpeted rooms.

#### **TO WEAR**

Can be sprinkled on your clothes or on your body. Follow the various instructions when they are offered.

#### **TO CHARGE A ROOM**

Leave an open jar or container with the oil in it. It can also be placed on clear quartz crystals, or sprinkled around the rooms.

#### **LIGHT OR FRAGRANCE RING**

Add a few drops of oil with your intent focused. Place the ring on top of a light bulb.

#### **POTPOURRI**

You need to focus on your purpose, then add a few drops to the potpourri.

#### **AROMATIC DIFFUSERS**

Add water to the top part of the diffuser, light the candle underneath it. As you add a few drops of the oil to the water for your intent, focus on the outcome you want and see yourself being happy.

## *Chapter Two*

### **SPIRITUAL APPLICATION OF OILS**

These oils are the most well-known and commonly used. Some of the oils can be found in botanicas, some in religious stores, occult houses, nutrition stores, in department stores - in the following sections; near the candles, by perfumes or near aromatherapy items, plus numerous other places. With so many resources available to you, if you do not find the exact oil you are looking for, you can always substitute another oil which has the same purpose. The oils have varied names, some named by the practitioner through psychic "feel." Do not confuse the oils by assuming you know the purpose by its name.

Oils, tinctures, perfumes and essences have the same intent in magick, this makes finding the correct one for your use much easier. On the following pages you will find a mix of many different oils to choose from.

In ancient magickal history, priests, chemists, occultists, alchemists and magi used their psychic senses to divine the vibrations and purposes of a flower, fruit (peels), wood, grass, leaf, root tuber, insects among other things in nature. This information for the alleged use of oils has been passed down by word of mouth and sometimes can even be found documented. The power of the focus you add is the main ingredient and should be taken seriously. After all, you as the practitioner have the power to attract or repel what is desired in your life. You know what is best for you. Be sincere and positive in your work and all will go well.

## *Conclusion*

Occultists, mystics, shaman as well as all other forms of Spiritual Workers have used the vast storehouse of knowledge on the magickal utilization of oils.

We have God's help in being able to manifest all our needs and desires.

The oils alone or added to other spiritual tools are meant to help improve our life, our body, mind and soul. The Elemental Spirits, Angelic Forces, Nature Spirits, Spiritual Guides are among other natural resources at our disposal.

In ancient times, the Egyptians, Chaldeans, Ethiopians, Persians, Vikings and all other cultures, trained their chiefs, high ranking officials and religious leaders to be great in the magickal arts. Magickal leaders searched into all forms of nature to see what causes and effects were in motion. Then they learned how to work with the powers of nature to manifest what they chose. Everything in nature has a bio-electrical frequency. Some oils have a higher field than others. Such as Rose Oil. This oil also gives off a very strong vibration on a Kirlian photograph.

Nature's magick is the highest power of the natural sciences. We are all part of and one with all of nature. Anything you can conceive, you can also manifest. We are the co-creators of our lives.

Use these oils as a powerful tool to better your life, your surroundings and the lives of others. God wants us to be happy, so focus your intent on the goals that will help you achieve a happy and successful life.
